

## Repaplast Plastic Repair System

Art.: 10.1912.9999

Set

The Repaplast Plastic Repair System is a unique set of products specially developed to carry out repairs of plastic parts in a professional and effective manner. Due to the unique composition of the products, they approach as closely as possible the original structure and properties of the plastic parts to be repaired. This means that the repairs are very durable and capable of following the flexibility of the plastic.

The Repaplast Plastic Repair System is suitable for just about every common type of plastic such as PP, ABS and polyester. With this system damage to plastic can be repaired perfectly in many cases. With this system these plastic parts, which are often expensive, do not have to be replaced. With a very small investment in time the damaged or cracked part can be returned to its original condition. The Repaplast Plastic Repair System can be used for the long-term repair of all kinds of damage, varying from scratches to cracks and holes.

The Repaplast Plastic Repair System is also ideal for the fast and effective repair of damaged or broken clips, screw bolts or threaded holes.

The Repaplast Plastic Repair System comes complete in a durable case, to keep everything you need to hand during the repair.

- System for repairing damage to plastic parts.
- Expensive plastic parts do not have to be replaced.
- Very small investment in materials and time.
- Extremely well suited to broken clips, screw bolts or threaded holes.
