

## PRODUCT INFO

# Lube Shuttle Adapter

Art.: 90.1923.9999

The Lube Shuttle Adapter has been specially developed to apply greases directly from Lube Shuttle grease cartridges. This adapter is ideal for use in places where the grease is not pumped into a nipple, but applied directly onto a (running) surface or into a protective sleeve.

The Lube Shuttle Adapter can be screwed directly onto a Lube Shuttle grease cartridge. So with this adapter, greases can be applied quickly and easily using an open cartridge gun like the [Lube Shuttle Gun Basic](#).
